## DETAILED ACTION

### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 39-98, drawn to a material and method of use a sunscreen composition comprising metalloorganic compounds of (Ia).

Group II, claim(s) 39-98, drawn to a material and method of use a sunscreen composition comprising metalloorganic compounds of (Ib).

Group III, claim(s) 39-98, drawn to a material and method of use a sunscreen composition comprising metalloorganic compounds of (Ic).

Group IV, claim(s) 39-98, drawn to a material and method of use a sunscreen composition comprising metalloorganic compounds of (Id).

Group V, claim(s) 39-98, drawn to a material and method of use a sunscreen composition comprising metalloorganic compounds of (IIa).

Group VI, claim(s) 39-98, drawn to a material and method of use a sunscreen composition comprising metalloorganic compounds of (IIb).

Group VII, claim(s) 39-98, drawn to a material and method of use a sunscreen composition comprising metalloorganic compounds of (IIc).

Group VIII, claim(s) 39-98, drawn to a material and method of use a sunscreen composition comprising metalloorganic compounds of (IId).

The inventions listed as Groups I-VIII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: each group employ a structurally diversified metalloorganic compounds. They do not possess a common core

Art Unit: 1617

structures and therefore no special technical features are present. Unity of invention is therefore lacking and the restriction is appropriate.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

1. R, R', R'', and X,
2. UV-A sunscreen agents, and
3. functionalized polymer.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Claims 43-54, 85 for species R, R', and R''  
Claims 55-58, 87 for species X  
Claims 62-63, 90-92 for UV-A sunscreen  
Claims 67-69, 93-95 for functionalized polymer.

Art Unit: 1617

The following claim(s) are generic: 39-42, 59-61, 64-66, 70-84, 86, 88-89, and 96-98.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The species listed above lack of common core structure and in addition, they do not belong to a specific class that is recognized by the state of the art. For example, R, R', R'', and X can be essentially anything from simple alkyl structure to cyclic or heterocyclic structure to any known dermatological or cosmetic actives. Since no special technical features are present, the election of species requirement are considered proper.

Because the above restriction/election requirement is complex, a telephone call to applicant's agent to request an oral election was not made. See M.P.E.P. Sec. 812.01.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
